Cred Leak Breachalarm Simple: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed. GK

Product map: what Cred Leak Breachalarm Simple is for

WHAT IT IS

The email check calls the Have I Been Pwned v3 API, which needs a paid API key. Set it in the HIBPAPIKEY environment variable before running with -e. The -o and -t modes print a p.

WHAT GOES IN

The files at the top of the tree: main.py, README.md, requirements.txt.

WHAT COMES OUT

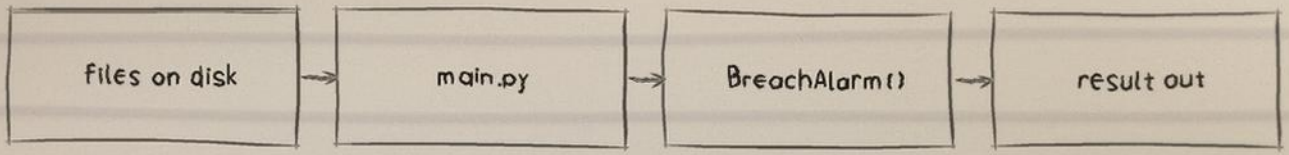

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand.

Cred Leak Breachalarm Simple: data flow, in one direction

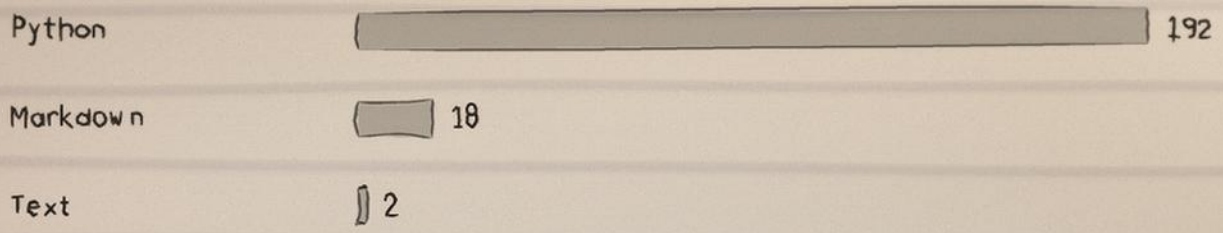

One direction. Anything the code does not do is not drawn.

second sheet, GK

Cred Leak Breacholarm Simple in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

5 files in the tree.
7 commits, first 2025-06-10, last 2026-10-30, from the local git log.
No test files by name in this snapshot.
